EXPERIENCE

AI Training Data Annotator — Prompt Quality Review (Telecom / 3GPP)

2026 – Present

Freelance, Remote

- Review and quality-score AI-generated prompts and responses against 3GPP telecom specifications, ensuring technical accuracy and annotation consistency for model training data.
- Collaborate with a distributed annotation team to identify recurring quality issues and improve review guidelines.

PROJECTS

DATAFLOW — Cloud Data Engineering & Migration Platform

dexo.rkdev.pro

Python, PySpark, GCP, BigQuery, PostgreSQL, MongoDB, Airflow, Terraform

- Built and deployed a cloud data platform that ingests structured data from PostgreSQL and MongoDB, performs ETL/ELT processing with Python and PySpark, and prepares analytics-ready datasets for BigQuery.
- Implemented data pipelines with schema validation, data-quality checks, deduplication, incremental processing, and source-to-target reconciliation for reliable data migration.
- Added Airflow-based workflow orchestration, Terraform infrastructure-as-code, automated testing, and GitHub Actions CI/CD to improve pipeline reliability and deployment automation.

ARIS — Accident Response Intelligence System

aris.rkdev.pro

Python, Node.js, PostgreSQL, WebSockets, JWT, Supabase

- Designed and deployed an AI-powered accident detection platform with real-time surveillance, emergency dispatch, analytics, and live alerts.
- Implemented WebSocket-based event processing with live alert latency below 2 seconds and an analytics dashboard supporting 6 simultaneous camera feeds.
- Integrated PostgreSQL and Supabase for cloud data storage and implemented JWT authentication with role-based access control.

RASU — AI-Powered E-Commerce Platform

rasu.rkdev.pro

React.js, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs

- Architected and deployed a full-stack platform integrating AI/ML features, REST APIs, authentication, databases, search, checkout, and order tracking.
- Built multi-parameter search across category, price, gender, and fashion type, reducing product discovery time by approximately 40%.
- Developed backend services with Node.js and Express.js, applying Git/GitHub, API testing, debugging, and CI/CD practices.

CERTIFICATIONS

- Python — Kaggle (2026)
- Intro to Deep Learning — Kaggle (2026)
- Intermediate Machine Learning — Kaggle (2026)
- JavaScript Algorithms & Data Structures — freeCodeCamp (2026)

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Full-Stack & Backend: React.js, Node.js, Express.js, REST APIs, WebSockets

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: GCP, BigQuery, Docker, GitHub, CI/CD, Terraform

Data & Machine Learning: PySpark, ETL/ELT, Pandas

Core CS Fundamentals: OOP, DSA, DBMS, Operating Systems, Computer Networks

EDUCATION

Siksha 'O' Anusandhan University (ITER)

Bachelor of Technology – Computer Science & Information Technology

Bhubaneswar, Odisha, India

2026
